

Students (top to bottom) Joel Carrasco, Sarah Neill, Daniel Stamps, Colby Kibbe & Kimberly Chee are all working on the production of their own single color eight page booklet. The booklet is printed using each side of an 11x17" sheet of paper. The printed sheet is then folded and stitched to 5.25x8" to create the booklet. Each student created their own unique booklet as a project for the GRTC3351 course, then printed and finished the booklet as a project in the CRTC3352 lab.

Top picture shows Joel checking his document to ensure that the image is straight and centered on the paper. He will make the necessary adjustments to the printing press to make this happen.

Bottom pictures show Daniel programming the paper cutter with Joel watching, Colby operating the press and Kimberly using a quality control device called a densitometer which is used to help maintain
